

POWER FAILURE? No Problem!

With Standby **KOHLER**[®]
Generators

SOLD, INSTALLED & SERVICED BY...

Protect Your **HOME OR BUSINESS** From Power Failures With **KOHLER®** Generators

The Answer to Mother Nature's Mood Swings.

Keep the movie on, the coffee brewing and the moment alive. Whatever the weather's doing doesn't matter. When a bad storm or utility failure knocks out your power, KOHLER® generators keep you connected to what you love to do.

We have a Ph.D. in power.

In just 10 seconds, KOHLER generators can automatically power your AC, heat, sump pump and major appliances like your fridge and oven – all at the same time.†

We build them to last.

Inside every KOHLER generator is a commercial-grade engine built to withstand extreme workloads over many years. (Think heavy-duty construction equipment.)

We eat, sleep and breathe quality.

KOHLER generators are meticulously quality-tested, start to finish. Once the design passes our inspection, they are ready for production. Before they leave our factory, we test them again for total reliability.

We're trusted everywhere.

Hospitals, nuclear power plants and even the National Weather Service trust in hard-working, long-lasting KOHLER generators.

We back them with a premium warranty.

You get our 5-year, 2,000-hour protection, plus a corrosion-proof enclosure that's built to last.††

We're over 90. And only getting better with age.

We built our first generator in 1920. Since then we've had one simple goal: build the best generators in the world.

† Based on generator and load size.

†† 14- and 20-kW models feature corrosion-proof enclosures; all other models feature corrosion-resistant enclosures.
